

DIVETY®

*Bright'n up
your dive gear!*

SOLAS Reflector
easy to attach
to the dive gear

Seareq

DIVE + SAFETY = DIVETY®

DIVETY® from Seareq is a SOLAS®-Reflector*, perfectly made for divers.

Fixed at the highest point, for instance at the top of the corrugated tube to the shoulder it is most effective. It may even save lives by reflecting sun or searching spots and draws attention to the diver.

Thanks to its solidly sewn velcro it is easily to attach it to the diving equipment but may also be fitted to other positions of the equipment or, e.g. to the camera.

*SOLAS® stands for "Safety Of Life At Sea" and is an international valid certification of IMO, International Maritime Organization a division of the UN. It guarantees that the reflector does not get "blind", yellow or greenish even not after numerous dives in salt or fresh waters.

Minimal effort, maximal effect: DIVETY®

Bright'n up your dive gear!
