

Neoprene Head Gear by Seareq: "*LITTLE RED DIVING HOOD*"

The diving hoods "*LITTLE RED DIVING HOOD*" from Seareq are made from soft neoprene in the safety colour "Bright Orange".

The hoods are available in 3 mm and 7 mm stretch neoprene which is laminated inside.

PLAUSIBLE SAFETY

The signal colour "Bright Orange" of "*LITTLE RED DIVING HOOD*" is evident!

Additionally every hood is equipped with 3 SOLAS*-Reflectors: one at every side in the height of the ears/temples, one at the back of the head.

This provides a maximum of visibility of the diver – under water and on the surface!

- Even above long distances
- At bad weather conditions and
- At bad visibility!

*SOLAS stands for "Safety Of Life At Sea". It is an UN convention for safety for ships. The international agreement concerns and regulates the safety for human beings life at sea. A SOLAS-Certification guarantees a compliant quality for the materials and means that the reflectors don't become yellow, green or blind - even after multiple dives in salt or fresh water.

The very comfortable cut encloses head, throat and neck down to the shoulders and keeps warm – without narrowing. The diver has a non-restricted mobility and nothing compresses larynx, air tube, thyroid gland, etc.

Seareq's "*LITTLE RED DIVING HOOD*" fits to nearly all available diving suits: regardless if dry-, wet- or semi-dry suits and even to tropical suits.

BECAUSE SEEING AND BEING SEEN IS VITAL FOR SAFETY!

No long drifts on the surface and nerve-wracking waiting until the boat picks one up. Seareq's "*LITTLE RED DIVING HOOD*" makes divers immediately visible.

SAFETY UNDER WATER:

Although the safety colour orange is conspicuous to the human eye, it has no impact on the natural reaction of the marine life.

Unperturbed by the colour, neither small nor big fish alter their behaviours when they see Seareq's "*LITTLE RED DIVING HOOD*".

FEATURES OF "*LITTLE RED DIVING HOOD*" NEOPRENE HEAD GEAR

1. SOLAS-Reflectors reflecting sunshine and searching spots and providing a maximum of visibility of the diver.
2. A comfortable cut and soft neoprene providing warmth and perfect fit without tight-fitting.
3. Carefully sewed beads avoid leaking of water.
4. The hoods are combinable with nearly all available diving suits due to the border which ends close to the neck.

HEAD GEAR FOR ALL NEEDS:

Although the safety colour "Bright Orange" is conspicuous to the human eye, it has NO impact on the natural reaction of the marine life.

Unperturbed by the colour, neither small nor big fish alter their behaviours when they see Seareq's "LITTLE RED DIVING HOOD".

7 mm "LITTLE RED DIVING HOOD"

Seareq's "LITTLE RED DIVING HOOD" in 7 mm is available in different sizes:
S – M – L – XL – XXL.

The 7 mm neoprene hoods are inside laminated with terry cloth and titan. This provides comfortable warmth at the head even in very cold water and during long dives.

A soft collar made from 5 mm neoprene encircle the face of the diver and makes sure that as less water as possible liquids into the hood. "LITTLE RED DIVING HOOD" is easy to put on and off thanks to the flexible stretch neoprene and its lamination of terry cloth and titan and the soft collar around the face.

3 mm "LITTLE RED DIVING HOOD"

Seareq's "LITTLE RED DIVING HOOD" in 3 mm is available in the sizes:
S – M – L – XL.

The hoods are laminated with soft fabric to put on and off comfortably. The perfect head gear in warm waters.

2 mm Forehead-Band "LITTLE RED DIVING HOOD"

The Forehead-Band made from 2 mm soft stretch neoprene keeps the ears and the frontal sinus warm during staying on board, sailing, surfing, wind- and kite-surfing, snorkelling and many other water sports activities.

2 SOLAS*-Reflectors: one at every side in the height of the ears.

2 mm Mask-Strap Cover "LITTLE RED DIVING HOOD"

The Mask-Strap Cover is perfect for divers and snorkelers using a neoprene jacket with fixed attached hood. It fits on all kinds of mask-straps.

1 big SOLAS*-Reflector placed at the back of the head.
